MOEN®

HOME CARE®

Bath Safety Products

Make Every Bath a Safe

Safety, comfort and peace of mind. It's engineered into every Moen® Home Care® product we make. You can be sure that when you select Moen®, you're getting a product that not only meets the ADA's exacting standards, but yours as well.

You can feel the difference in our quality design. You can see the difference in our attention to style and detail.

Trusted safety, unmatched comfort. That's our commitment to you.

All Moen® Home Care® products are designed based on feedback from healthcare professionals, including occupational therapists and physical therapists.

Excellence in Customer Service

Moen® Home Care® products feature a Limited Lifetime Warranty. Visit moen.ca/homecare for complete warranty information.

Bath™

According to recent data gathered and reported by the National Association of Home Builders (NAHB) Remodelers:

- 70 percent of remodelers surveyed reported making universal-design home modifications —a significant bump from 60 percent in 2006
- The two most frequent aging-in-place modifications include adding grab bars (78 percent) and installing higher toilets (71 percent)
- 84 percent of homeowners have at least some knowledge of universal design solutions
- The majority of aging in place remodels are for those age 55 and older, although younger audiences are becoming more interested in making it easier for older visitors or children
- 70 percent of homeowners started remodeling projects for aging in place to plan for future needs

Homeowners looking to remodel with universal design can hire a Certified Aging-In-Place Specialist (CAPS), a specialist trained in designing to meet the unique needs of the older adult population and adding aging-in-place home modifications.

SecureMount™ System

SECUREMOUNT™ ANCHORS + SECUREMOUNT™ GRAB BARS = THE ULTIMATE SYSTEM FOR EASY, SECURE GRAB BAR INSTALLATION

Exclusively from Home Care® by Moen®, the SecureMount™ System provides the ultimate in easy, secure grab bar installation, PLUS stylish designs and choices in finishes and features.

The Smart Innovation of SecureMount™ Anchors

Precision-engineered for optimal bracing behind the wall, SecureMount™ Anchors allow for easy grab bar installation - with no studs required.

SecureMount™ Grab Bars

Patented flange design makes it easy to connect to the stud at multiple points.

Easy, Secure Install... Anywhere On The Wall!

SecureMount™ Anchors and Grab Bars make it possible to quickly and easily install a grab bar with studs – or without studs.

✦SMA1000 SecureMount™ Anchors sold separately from SecureMount™ Grab Bars.

Meets The Americans with Disabilities Act (ADA) Specifications.

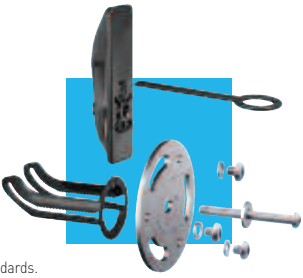
Versatile

Installs anywhere on the wall and can be used with all Moen®, Moen® Home Care®, and virtually all other grab bars. Mounts securely to a variety of substrates*:

- 1/2" Drywall
- 5/8" Drywall
- 1/2" Drywall with tile
- 5/8" Drywall with tile
- 1/2" Drywall with marble
- 5/8" Drywall with marble
- 1/8" Fiberglass tub surround
- 1/4" Fiberglass tub surround

* Including multiple layers up to 1-1/2" thick.

Independently tested by CSA and NAHB laboratories to exceed ADA, ASTM, ANSI and CSA standards.



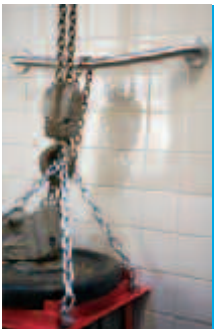
Installation is as easy as 1-2-3!

Technology allows anyone to quickly and easily install grab bars securely.

1. Drill It

2. Install It

3. Mount It



Utilizing the principles of physics, the D-shape anchor is precision-engineered for optimal bracing behind the wall.

During independent testing, SecureMount™ Anchors held up to 1,500 lbs.!*

In static load testing, 600 lbs. of weight bent this 1-1/4" bar—but the SecureMount™ Anchors didn't budge!

* During static load testing in 5/8" drywall with marble.

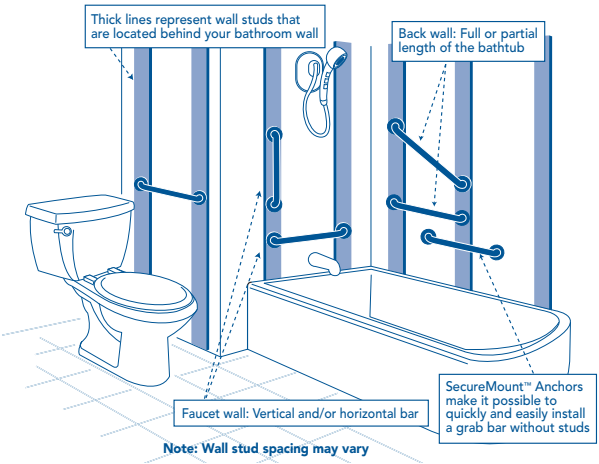
How to Buy Grab Bars



Triple your safety.

It is recommended that bathrooms be equipped with grab bars in the tub, by the toilet and in transition. Get the complete set from Moen®.

Who Should Use Grab Bars?

Everyone! People of all ages and abilities can benefit from using grab bars.

What Can A Grab Bar Do For You?

- Reduce your risk of falling in the tub or shower.
- Help you steady yourself while getting into and out of the bathtub or shower.
- Assist in safely lowering and raising yourself from a seated position.

How Many Grab Bars Do I Need And Where Should They Be Installed?

Health professionals typically recommend three grab bars in a bathroom:

- At least one along the back wall in the bathtub or shower.
- At least one along the showerhead wall or whichever end of the tub/shower you use to enter/exit.
- At least one near the toilet.

Things To Consider When Selecting Your Grab Bar(s):

- Length: Select a grab bar that is the suitable length for your bath or shower area.
- Finish: Consider a grab bar that matches your faucet and other fixtures.
- Weight Capacity: Choose a grab bar that at least meets ADA requirements (250 lbs.); SecureMount™ Grab Bars have a 500 lb. weight-pull capacity that exceeds ADA requirements.
- Installation: Grab bars that feature the SecureMount™ icon have a design that allows for secure installation into a stud or wood backing when installed at any angle. When using SecureMount™ Anchors, there is no need for installation into a stud or wood backing.
- Grip Surface: Consider a grab bar with a textured surface or grip feature that provides a better hold in a wet bathroom environment.
