

CADET® 3 FLUSHING SYSTEM

This system features a smarter design that delivers higher performance and fewer clogs—all at a great price. What's more, its easy-to-clean design makes it ideal for medium- to high-use bathrooms. And, both our new Compact Cadet 3 Right Height one-piece and two-piece elongated toilets will fit easily into a round front space, so you can have an elongated bowl in a smaller space without sacrificing comfort.

The Cadet 3 EverClean® Slow-Close seat.

The lid features Finger-Lift access.

A **EXTRA-WIDE 3" FLUSH VALVE**

The larger, chemical-resistant flush valve allows more water to enter the bowl faster, creating a cleaner flush. It won't warp or distort like ordinary flappers. The 3" opening allows water to flow into the bowl over 80% faster than a standard 2" flush valve.

B **2-1/8" SIPHON TRAPWAY**

With a larger diameter than the industry standard, this fully glazed siphon trapway features no choke points and a 2" ball pass to help prevent clogging. It can move a 60% larger mass than a standard 2" trapway can.

C **EVERCLEAN® SURFACE**

This feature inhibits the growth of stain- and odor-causing bacteria, mold and mildew on the surface. The entire surface of tank and bowl are treated inside and outside.

5-YEAR WARRANTY*

Covers everything inside and out for total confidence.
